## DETAILED ACTION

This office action is in response to the filing of the Application on 12/30/03.

### *Information Disclosure Statement*

The examiner has considered the item listed on the Information Disclosure Statement filed 12/20/03. A signed copy of the substitute Form PTO-1449 is herewith enclosed.

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. **Claim 1** is rejected under 35 U.S.C. 103(a) as being unpatentable over Niki et al (WO 01/08229) in view of Kimura et al (US 2002/0105279 A1). The national stage of Niki et al, i.e., Niki et al ((USPAT 6,674,098 B1) shall be used as translation for reference. Niki et al teach a transparent electrode 8/7 (col. 9, l. 20-52) of indium tin oxide (ITO) and ZnO as its main materials, wherein its surface is covered with a Mg-doped ZnO film 6 (col. 9, l. 20-41). Niki et al do not necessarily teach the limitation that said transparent electrode has ZnO as its main material. However, it would have been obvious to include said limitation in view of Kimura, who, in a patent application drawn

to a light emitting device with transparent electrode, hence analogous art, teaches a transparent electrode layer having ZnO as its main material to be equivalent with an ITO transparent electrode layer (par. [0101]). Inclusion of the teaching by Kimura in the invention by Niki et al would have been obvious at least because it would simplify the manufacturing process through a reduction of the number of different materials needed. Secondly, Applicant is reminded that Applicant that it has been held that mere selection of known materials generally understood to be suitable to make a device, the selection of the particular material being on the basis of suitability for the intended use, would be entirely obvious. In re Leshin 125 USPQ 416.
